■ URGENT: Launch blocked — speech model rejecting tokens

From: Madison Kim, Engineer - LaunchOps Team

To: Alex Lee, Engineering Lead

Time: 9:25 AM

Hi Alex,

We've traced the issue. The speech-to-command model currently running was pushed from our **test server** (`test-deploy.adatum.com`), not the production registry.

This version doesn't recognize live API tokens, which is why all devices are refusing commands.

The fix: Disable the test update channel and revert to **v2.8.3**, our last verified production model.
